## EXPERIENCE

### Teleperformance: Telia Project, Solna — *Customer Service*

Oct 2021 - Feb 2022

Worked 2 months in the invoice department where I helped customers with their issues about the bills, and 2 months in the broadband support department to help customers install internet devices or fix issues regarding their internet.

## EDUCATION

### Mid Sweden University, Sundsvall — *Masters*

Sep 2022 - Present

Studying Masters of Science in Computer Engineering.

### Fyris gymnasium, Uppsala — *High School*

Aug 2017 - Jun 2021

Degree in Computer Science.+

## PROJECTS

### NGE — *OpenGL Based Game Engine*

NGE ( Newbies Game Engine ) is built using some OpenGL libraries with C++. The main goal with this engine is to simplify advanced game development for new game developers and programmers, and to make it run on any system whether it's Windows, Linux or Mac.

### GMS MultiWindow — *Library for Game Maker Studio*

MultiWindow is a library that would help any game developer using Game Maker Studio with debugging of multiplayer games.

### DirDar — *A tool to bypass forbidden directories*

This tool searches for forbidden directories in websites to find a way to bypass the 403 error. Used for Bug Hunting in web applications.
